

Student Name: gauthamp2person2

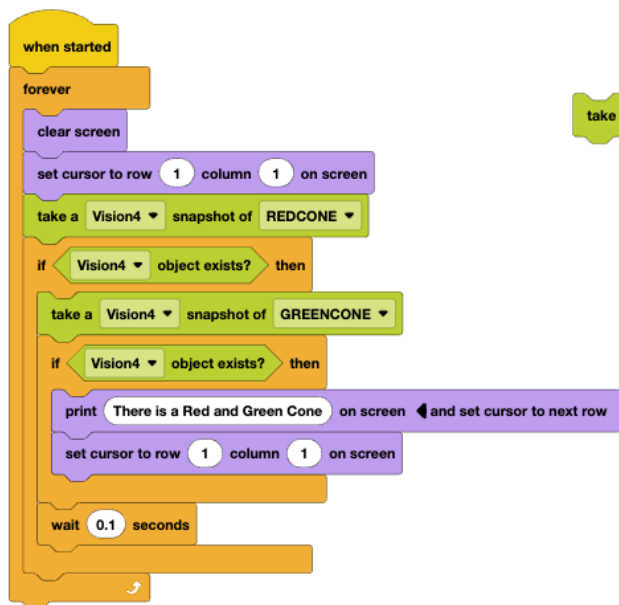

Assignment: 222

Notes: p2: gautham

Project Name: guesstheCone

Project Type: Blocks

Date: Tue Mar 17 2026

take a Vision4 snapshot of GREENCONE

set Vision4 object item to 1

Person 1: Use the above code to detect whether a red cone or a green cone is appearing

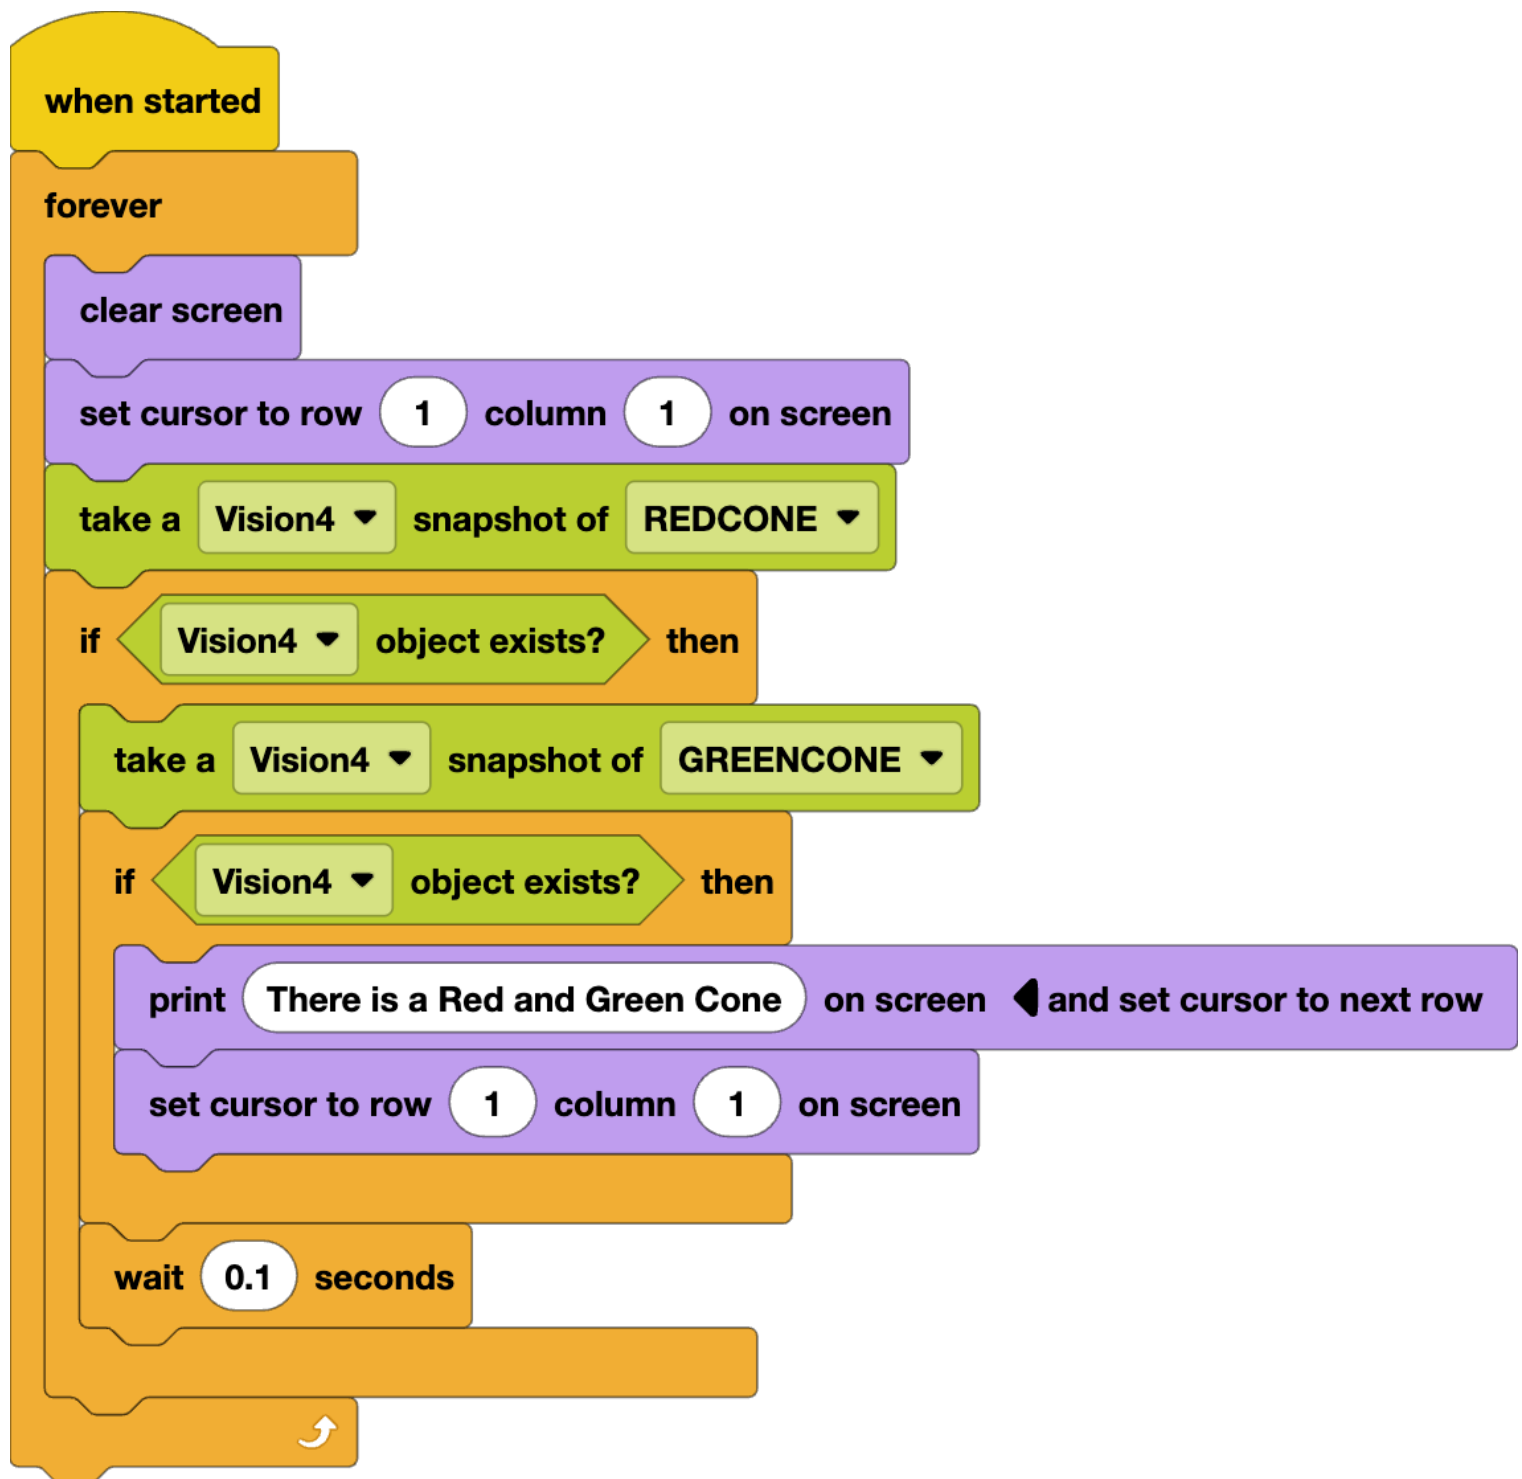

Person 2: Space out the detection of the cones so that the program can display one, two or three cones of different colors

Person 3: Create 3 variables, keep track of how many of each object have been detected

Team Create a game based on the cones. Mechanic should be based on rock paper scissors, or simon says

Person 4: Implement game sequencing based on team game rules

Team: Implement the score keeping
